## SAFETY DECALOGUE

Health and Safety at work is a joint effort.

Human life, health and physical integrity are the most valuable goods which cannot be costed nor exchanged.

Hazards are lurking in every step on our way home, in the street, at work premises.

Safe behaviour is a token of civilization and progress both for individuals and societies.

Safe behaviour could save our child, our wife, our relatives.

Safe behaviour is contagious but so is unsafe behaviour.

Executing any work requires training and authorization, keeping safety procedures, proper equipment and PPE.

Do not by-pass indifferent the signs and signals of danger

Our target is zero accident at the work place

Safety always comes first

Zero Accidents

Take care, think safe
